**Re: Construction Support Services
FREE Workshops**

Kaaterskill Associates is pleased to announce a series of **FREE** workshops developed specifically for contractors through our Construction Support Services (CSS) division. CSS was developed with the intention of bringing the various pieces of the construction industry together in order to provide support to the many component providers in the construction industry.

As contractors, you are more than aware of the challenges of working with multiple providers of distinct services and the need for a cohesive team effort. The goal of CSS is to offer information and support in order to assist you in achieving optimum results in a time and cost effective manner, as well as disseminate information to help increase your knowledge in industry advancements.

The FREE workshops will be provided on an interest basis and will be held once 6-10 contractors show interest in a specific subject. The classes will consist of no more than 10 people due to limited space. If, however, there is interest in certain areas and more workshops are necessary, we will try to schedule additional sessions in order to accommodate special requests.

We would like to hear from you if there are specific interests or concerns you have. Please fax back or send the application form as soon as possible in order to reserve your spot at one of our upcoming workshops as seats are expected to fill up quickly. We will try to accommodate your schedule to the best of our ability, so please take the time to let us know what time(s) would be best for you to attend.

We look forward to seeing you at one of our workshops!

Regards,
Kaaterskill Associates
